

### 3 US-MADE CUSTOM RECOGNITION MEETS ALL U.S. ECO STANDARDS

ATdesigns has been creating eco-friendly custom recognition since 1976. Made in the United States, these products are lead-free and environmentally safe in all states. Medals, belt buckles, key tags, lapel pins, golf accessories, and more are available! Minimums start at 25 pieces, and there are no die charges. The 'Made in U.S.A.' designation is available at no extra charge. ATdesigns is easy, reliable, fast, and affordable. Phone: 800.288.0111 | Website: [www.atdesigns.com](http://www.atdesigns.com)

### 4 GREENER PHOTOS ON METAL

Skip the chemicals by creating photo-quality images on metal with AlumaMark®—no etching, engraving, or adding chemicals. AlumaMark is specialized aluminum that may be imaged or marked using a CO<sub>2</sub> laser. AlumaMark will not fade or need to be replaced, reducing waste, and AlumaMark is 100% recyclable. This unique laserable substrate allows you to create black, positive marks—including lighter marks and halftone shades—on silver, gold, bronze, brass, or colored backgrounds. **Horizons Imaging Systems Group**, the maker of AlumaMark, is committed to reducing the environmental footprint of its internal operations and the image processing systems its customers operate. They follow or exceeding applicable laws, rules, and regulations, and work with customers to reduce related emissions and waste.
